

SLIP SHEET (PP SOLID)

PP CORRUGATED SHEET

NEYCOM BUBBLE SHEET

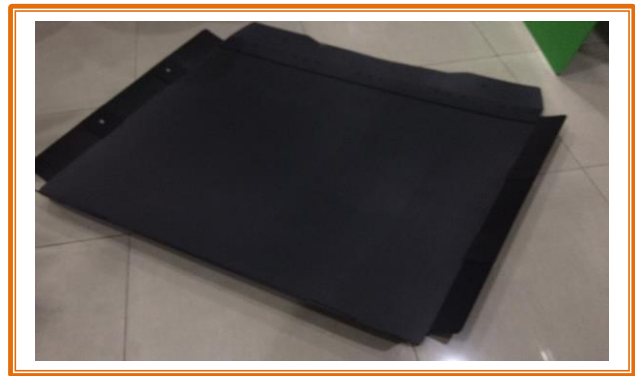

PP SOLID SHEET

TP POLYBOX

PP Slip sheets are made of PP Solid Sheets with the thickness of 0.5 mm - 2 mm. It is a cost-saving, sustainable and recyclable replacement to traditional wood pallets that are used for storage and transportation of goods in container shipment.

PP Slip sheets are light weight, water-proof, reusable and enable more product to be stored in warehouses or containers. They are also free from termite and bacteria resistant.

Plastic Slip Sheets are used for transporting unitized loads in conjunction with forklifts fitted with a push-pull device. The unit load is usually stretch wrapped or shrink wrapped for stability.

Slip Sheets vs. standard pallets

- Load more goods with Slip Sheets
- Huge savings
- Save space in storage
- Sustainable, 100% recyclable and hygienic
