

POSTAL SERVICE BOX

PP CORRUGATED SHEET

NEYCOM BUBBLE SHEET

PP SOLID SHEET

TP POLYBOX

Postal Service Box is also known as Mail Totes, as they are commonly used in postal service industry to store and distribute mails.

Different from foldable-design box, Postal Service Box is designed to be nestable so they ship and store inside of each other. And, as a way to strengthen the box and improve durability, it is ultrasonic-welded with a wire-reinforced rim.

Grip Holes

Ultrasonic Welding

Mails

Parcels

Courier Bags

Wire-reinforced Rim

Available in various sizes, design and colours!

Nestable
